

NEXT NATURE HABITAT VR

The natural habitat of the polar bear is the Arctic. The natural habitat of the scorpion is the desert. How about humans? What is our natural habitat? And how is this changing? What does it mean to live in a next nature?

To help us understand our world, we built an immersive experience that allows us to travel through different environments where we might live in someday. We created four scenarios (Garden of Eden, Modernist Dream, Techno Favela, Hypernatural Resort) that each present an alternative view of future worlds.

We invite you to step inside our virtual reality guided tour, to discover these four scenarios and join the discussion on our possible future habitat – for the humans living in the next nature.

WHAT DO WE OFFER?

FOUR VR SETS IN WHICH VISITORS CAN EXPLORE FUTURE ENVIRONMENTS.

A FULLY DESIGNED SETTING, GENERATING AN IMMERSIVE EXPERIENCE

TWO TRAINED NN HABITAT VR GUIDES, STIMULATING DISCUSSION

A SETTING THAT MAKES IT POSSIBLE TO TRACE THE AUDIENCES FAVORITE ENVIRONMENT

A POSTCARD BOOKLET DESCRIBING THE PROJECT AND THE FOUR VR WORLDS ('GREETINGS FROM THE GARDEN OF EDEN!')

So you are thinking about hosting the Next Nature Habitat VR? That's great!
We would like to provide you with some practical information.
Please read this form carefully.

TECHNICAL DETAILS

The following is required:
