

# HUBOT

The robots are coming! They're getting smarter, cheaper and more reliable. How long will I have my job before a robot steals it? The industrial revolution made muscular power redundant, the digital revolution automates our thinking. How to cope with that? Are we working against, or together with robots?

Inside the job agency, our trained staff will invite the visitor to take a career test. After the job choice has been confirmed, a robot will guide the visitor to the selected profession. Here the visitor will find the technology required for the job and receives more information about the profession.

HUBOT EXAMPLE JOB: EXOSKELETON MOVER

## MADE TO MEASURE

The exhibition is adaptable to different needs and can be hired including two apparently self-driving robots, a career test, four trained agency workers and printed material for all visitors.

## WHAT DO WE OFFER?

- A made to measure inspirational experience about the future of work
- 16 professions in which people and new technology work together
- 4 trained guides who stimulate discussion
- 1 or 2 robots on which your visitors can do a job test
- A supporting website on which your event can be published

## DESIGN FOR DEBATE

The exhibition is aimed at a wide public audience. We open the debate on the way we want to work in the future and how technology will affect our professional life. The jobs presented in the exhibition provide inspiration for a future where humans and robots will work together.

## WHEN TO BOOK US?

Are you looking for an inspirational experience for your conference, festival, school or company? Then HUBOT is what you need!

The exhibition is disguised as a job agency and presents up to 16 professions to reflect on how robotization not only takes away jobs, but can also offer new opportunities and professional figures.

### TECHNICAL DETAILS

- 2,4 GHz bandwidth is needed for use of the robots
- The size is scalable from 25 m2 to 125 m2
- 220V power supply is needed

### SUPERSIZE ME

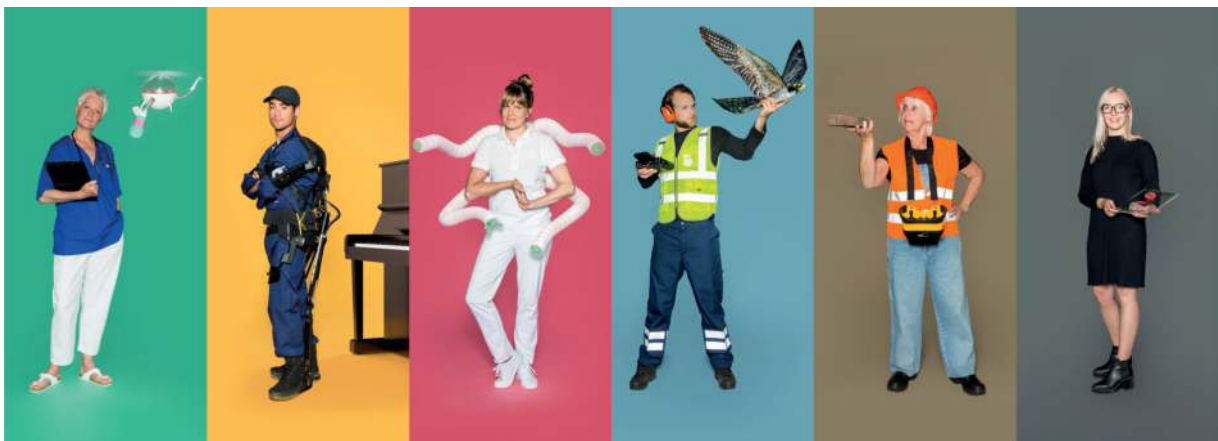

All exhibitions can be customized to meet your needs. To maximize impact we recommend combining our exhibitions with our workshops. Inquire about possibilities via [expo@nextnature.net](mailto:expo@nextnature.net)

### COSTS

The costs of hiring HUBOT include preparation, transport from- and to the location, up to 16 professions, four trained guides, up to two robots that interact with your audience and 16 different postcards with all professions for your visitors.

We will have an extra charge for longer opening hours, multiple days, extra staff, security and parking costs.

- The costs depend on your wishes and available facilities. Please contact us for made to measure offer.
