THE ECO COIN

The ECO coin is a new currency that rewards people for their sustainable actions. We collaborate with communities, companies and events to create a new green economy so that we can all help in the goal of balancing our collective ecology and economy.

HOW TO EARN

People earn ECO coins by carrying out sustainable actions that you decide: it could be biking to work or event, recycling plastic waste, participating in workshops or even taking part in digital quizes. ECOs are stored in a digital wallet.

HOW TO SPEND

ECOs are spent in our marketplace on circular products and sustainable services. Previous examples include secret areas, discounts to upcycled waterbottles, Tesla rentals and exclusive music content. Now people can do good and get paid!

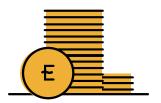

WHAT WE DELIVER TO YOU

- A co-created ECO economy which will empower people to become more sustainable
- A fully customised web based app with your desired actions, and a curated marketplace.
- Communication material to tell a coherent story for your community
- Live impact reporting. We can tell you how much carbon is being reduced in real time.
- A gamified experience for your community. We use leaderboards and team play!

Money is a technology that is in need of an update and we think its best to let everyone participate in its evolution. The ECO coin runs living labs: these are short to mid term explorations on what a new sustainable currency might look, act and feel like.

Our living labs are tailor made to the context in which we implement them. We work closely with you to make sure that we create a new economy where people can earn ECOs on tasks that are

achievable and spend ECOs on rewards that are desirable. This is why as part of any living lab we discuss the goals that you want to achieve and make sure that we understand your community.

CASE #1

A leading music festival approached us to create a new sustainable currency as they identified that to become 100% circular by 2020 they need visitors to change their behaviour. The ECO coin was used to educated and insentivise action through the two day event with over 2000 sustinable actions taking place.

CASE#2

An organisation wanted to make their office space into a new sustainable environment by using the ECO coin as a way to incentivise behavioural change. Taking the stairs instead of the elevator, turning down the heating or choosing the vegetarian option at lunch could all earn ECOs. 75% of staff voluntarily took part!

CASE#3

A municipality reached out to us as they wanted to create a new sustainable culture within their employees, whilst also saving money. The ECO coin was used to challenge employees to become ECO heros. Teams were created within different departments to help motivate people from many different job roles to get involved.

So you are thinking about running the ECO coin with your community? That's great! We would like to ensure you with some practical information.

LOCATION

From our experience, we have learnt that there are some optimal conditions for running the ECO coin within any community. We are also open to other environments where the ECO coin might also be applicable.

- EVENTS / FESTIVALS (MUSIC, ART, TECHNOLOGY AND DESIGN)
- OFFICE BUILDINGS
- UNIVERSITY CAMPUSES
- GOVERNMENT BUILDINGS
- HOTELS AND COWORKING SPACES

TECHNICAL

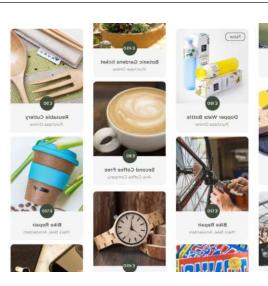

To run a successful living lab it's best that there are a few technical requirements met. These can be worked around, with additional costs and we aim to be as flexible as possible so that we suit the context.

- HIGH SPEED INTERNET NEEDED
- AN AREA FOR A
 CENTRAL HUB FOR
 INFORMATION AND
 FOR ANY TECHNICAL
 ISSUES
- 220 VOLT ELECTRICITY SUPPLY NEEDED
- DISPLAY MONITORS
 (OPTIONAL CAN HELP
 TO COMMUNICATE THE
 LIVING LAB)

COSTS

The cost of creating and running a living lab vary due to the size and customisation of the system. A basic setup would include 1000 accounts, 2 ECO coin experts, real time data management, signage and communication material. The system can be expanded to facilitate up to 50,000 people for 3 months. It is best to get in contact to discuss how we can meet your needs and what the costs would be.

Please fill in this digital form accurately and return it to us via email. We will get back at you as soon as possible.
